Dear Snowflake recruiting team,

I am writing this letter to convey my interest in applying for the Software Developer Internship position that was posted on your company website.

My name is Abdelkader Lagha a final year software engineering student at the Mediterranean institute of technology in Tunisia. I don't like to define myself by the work I've done. I define myself by the work I want to do. Skills can be taught, personality is inherent. I prefer to keep learning, continue challenging myself, and do interesting things that matter. Fueled by high energy levels and boundless enthusiasm, I'm easily inspired and more than willing to follow my fascinations wherever they take me. I'm passionate, expressive, multi-talented spirit with a natural ability to entertain and inspire. I'm never satisfied to just come up with ideas. Instead, I have an almost impulsive need to act on them. I believe I have the skills to create and implement software applications beneficial to the business of the company. Moreover, I have been an intern in many techs leading companies in Tunisia and such an experience has helped me developed skills required for me to keep learning and improving myself.

If I get accepted as an intern with the Snowflake company, this will be my first time immersing myself in an international company with new work culture. since I started working and having internships I was always surrounded by the Tunisian work culture and I believe I'm ready to start learning more from this company, I'm applying because I believe I can become the software engineer I always wanted to be which is an engineer that adds a great value to the company and not just any other developer in the team. I want to exceed my limits and expectations.

To further give details on my qualifications and other related professional skills, I have enclosed my Resume with My experience, certificates, and projects with more detail. I can be reached through email at abdelkader.lagha@medtech.tn.

Thank you so much for this opportunity and I look forward to hearing from you soon.

Sincerely,

Abdelkader Lagha
